Wonder tells the story of August, a ten-year old boy who lives with his parents and sister in New York. August, or Auggie as his family call him, is an ordinary boy in many ways. He rides a bike and likes playing with his Xbox. But Auggie was born with deformities of the face and looks very different from other children. We learn about his journey, his friendships and the kindness and bravery of children in this fantastic book. Through this lovely class text, children have made predictions and given reasons for these and are now learning to develop their scanning skills, literal retrieval skills and begin to look at using inference.
